

DATA ACQUISITION SYSTEMS (DAS)

All commercial PV projects receiving a Commonwealth Solar rebate calculated using a PV project size of over 10 kW (dc) must include an automated reporting system, and must report to the online Production Tracking System (PTS) for a minimum of five years. Residential projects are not required to automatically report production, regardless of size.

The following companies provide Data Acquisition Systems and related services. If you are a DAS provider and would like to add your company to the list below, please contact pts@cadmusgroup.com with your information.
